Technology Cheerleader

The mayor and county commissioners of the City of Miami honored Clemmie Perry with a proclamation during Women's Month, for implementing and performing community service work with two computer technology programs at Martin Memorial A.M.E. Church in Richmond Heights: Teaching Each Christian How to Use Systems (TECHS) and PowerUP Florida. The TECHS program — affiliated with America's Promise – Alliance for Youth, which was founded by U.S. Secretary of State Gen. Colin Powell — began in 1999 and has trained more than 600 African Americans to use computers.

Perry, owner and operator of E.T.C. – Educational Training Consultants, is a former professional NFL cheerleader. She recently wrote her first Christian Computer Workbook, "Using Theology to Teach Technology." She has a B.Sc. from Florida A&M University and a master's from Nova Southeastern University.
